

Solar Star Community Light

The Solar Community Light is a commercial solid metal light fixture with integrated solar modules, designed to light streets and yards. It has 45 powerful extra-bright LEDs, 18 watts of charging solar modules, automatic on/off light sensor and a 12-volt, 12 amp-hour sealed battery. This is not a garden light!

The Solar Community Light will stay on over 30 hours (that's 2-4 nights depending on time of year) without sunlight charge. The solar modules are guaranteed for 10 years and are made of tempered glass, Monocrystalline and Tedlar lamination (just like large commercial-grade modules). The battery should last 1 - 3 years depending on temperature and the LEDs 50,000 hours.

Characteristics:

- Power source: 18 Wp, 12 V Mono - crystalline solar panel
- Light time: 30 hours approx.
- Rechargeable battery: 12V 12 Ah
- Light source: 45 pcs super bright LED
- Pole height: 3 meters
- Size: 45 cm, 45 cm, 44.5 cm
- Warranty: 1 year
- Life time: battery 2 years, lights 50,000 hours , panels 30 years
- Carton size: 52 cm, 52 cm, 52.5 cm
- Replacement battery can be sourced locally

NOTE: The pole is not included. Local GI pipe is sufficient for the pole.
